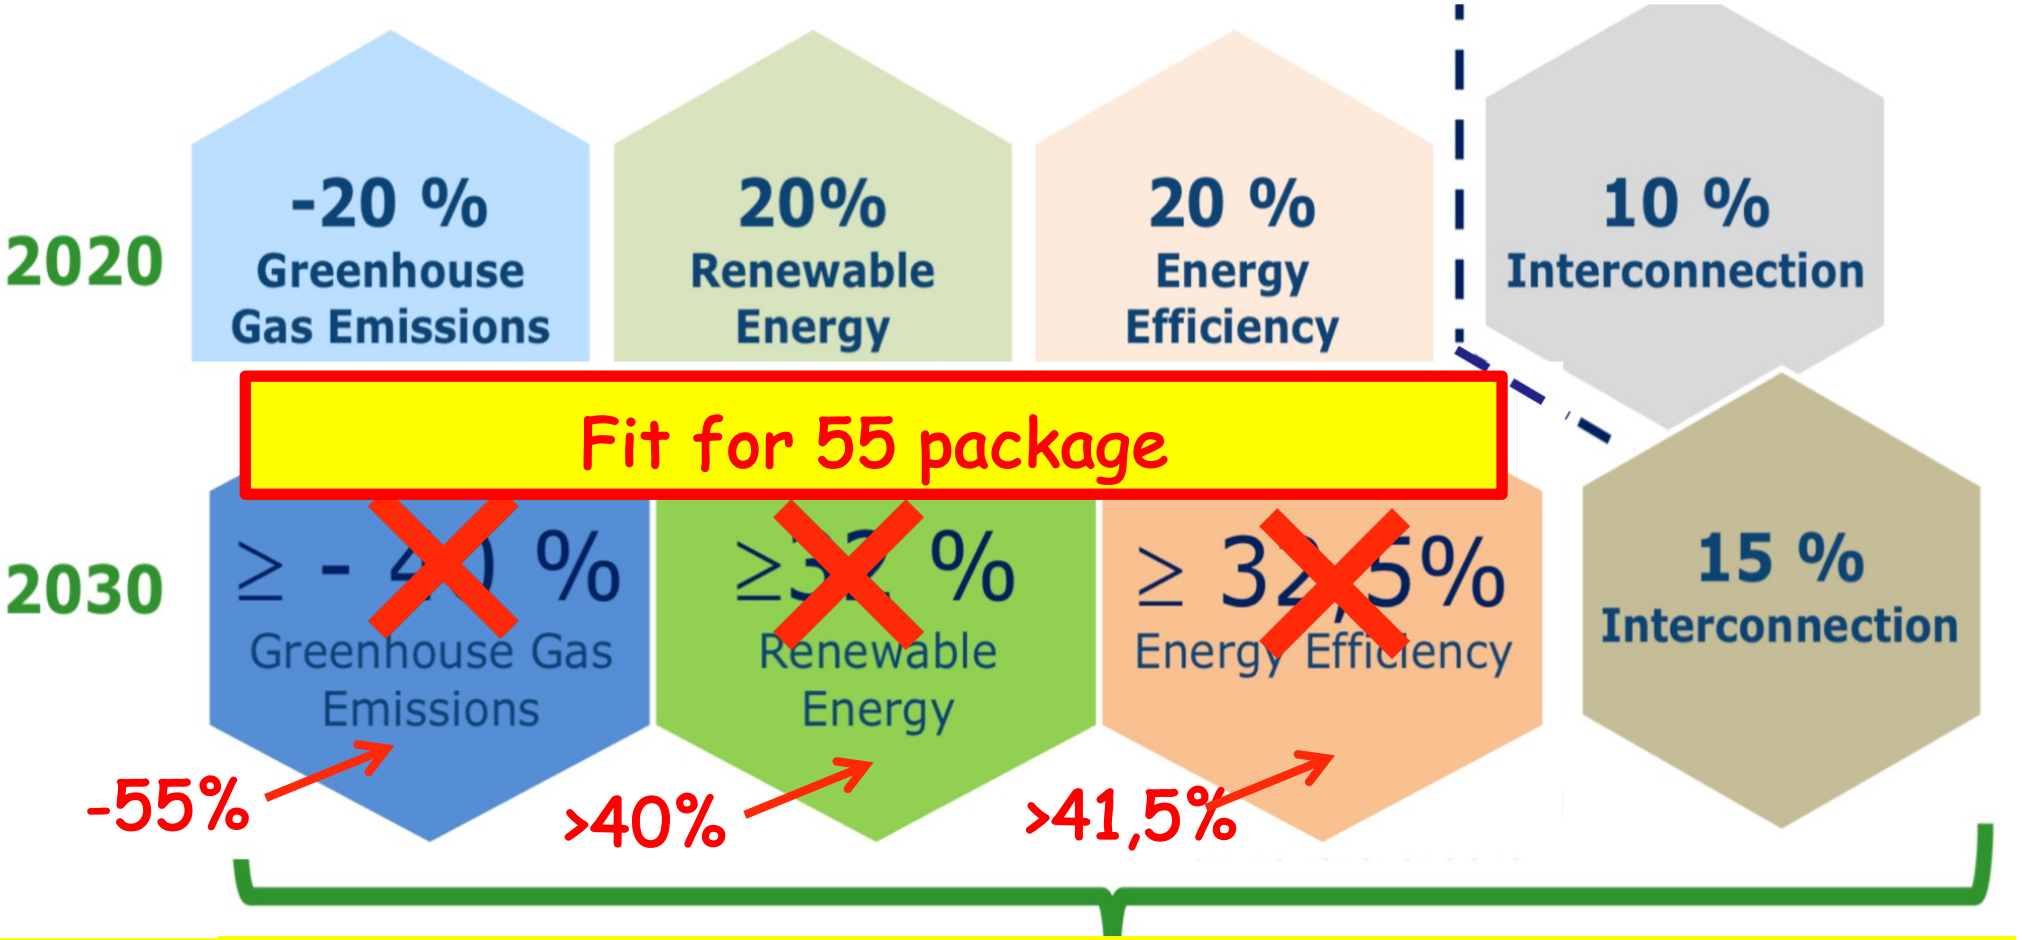
EU energy strategy

towards 2050

EU medium and long term targets

ρυθμιστική αρχή ενέργειας κύπρου
cyprus energy regulatory authority

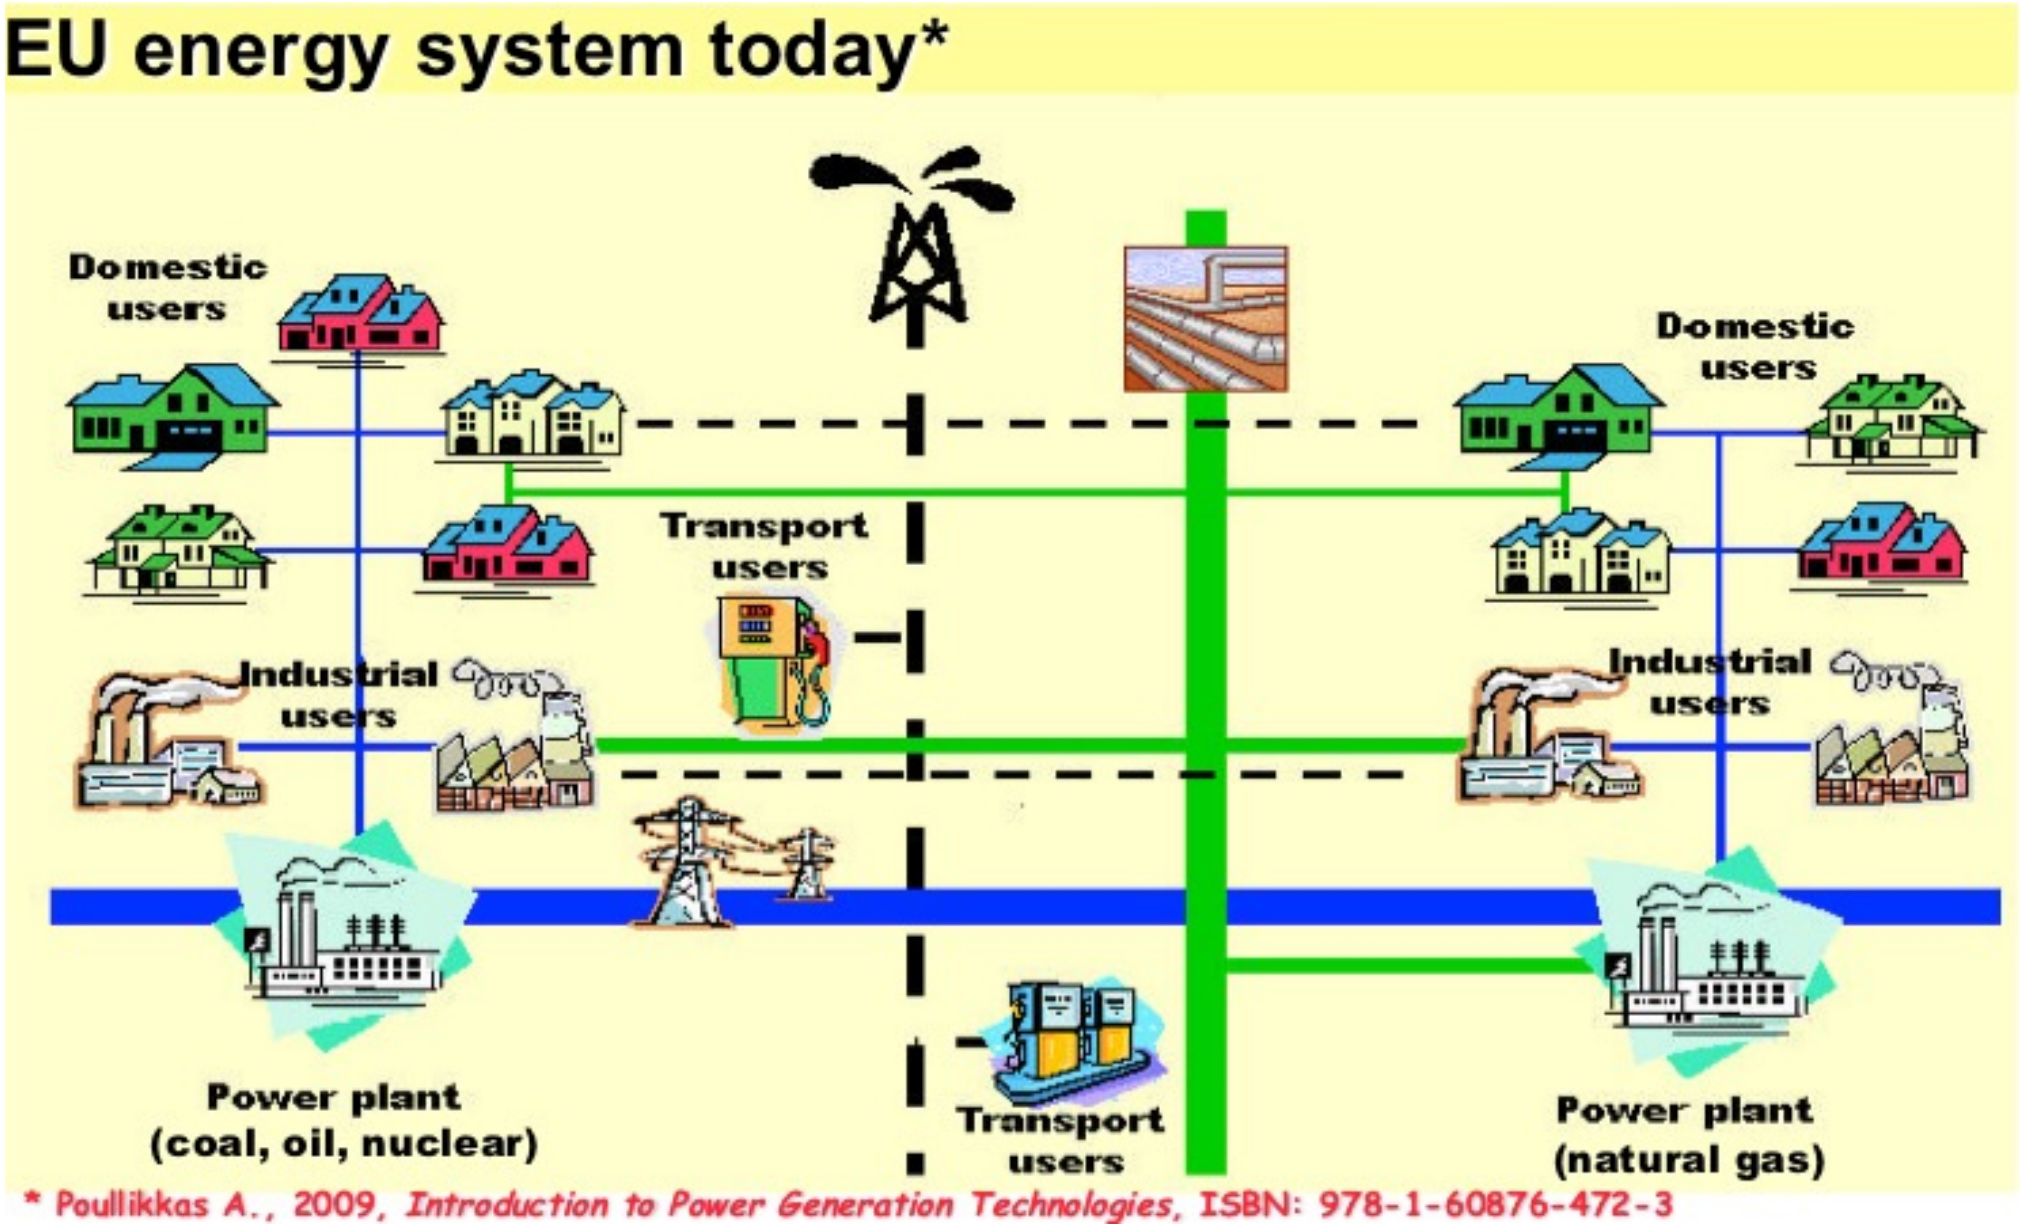


2050 **Climate-Neutral**

(an economy with net-zero greenhouse gas emissions)

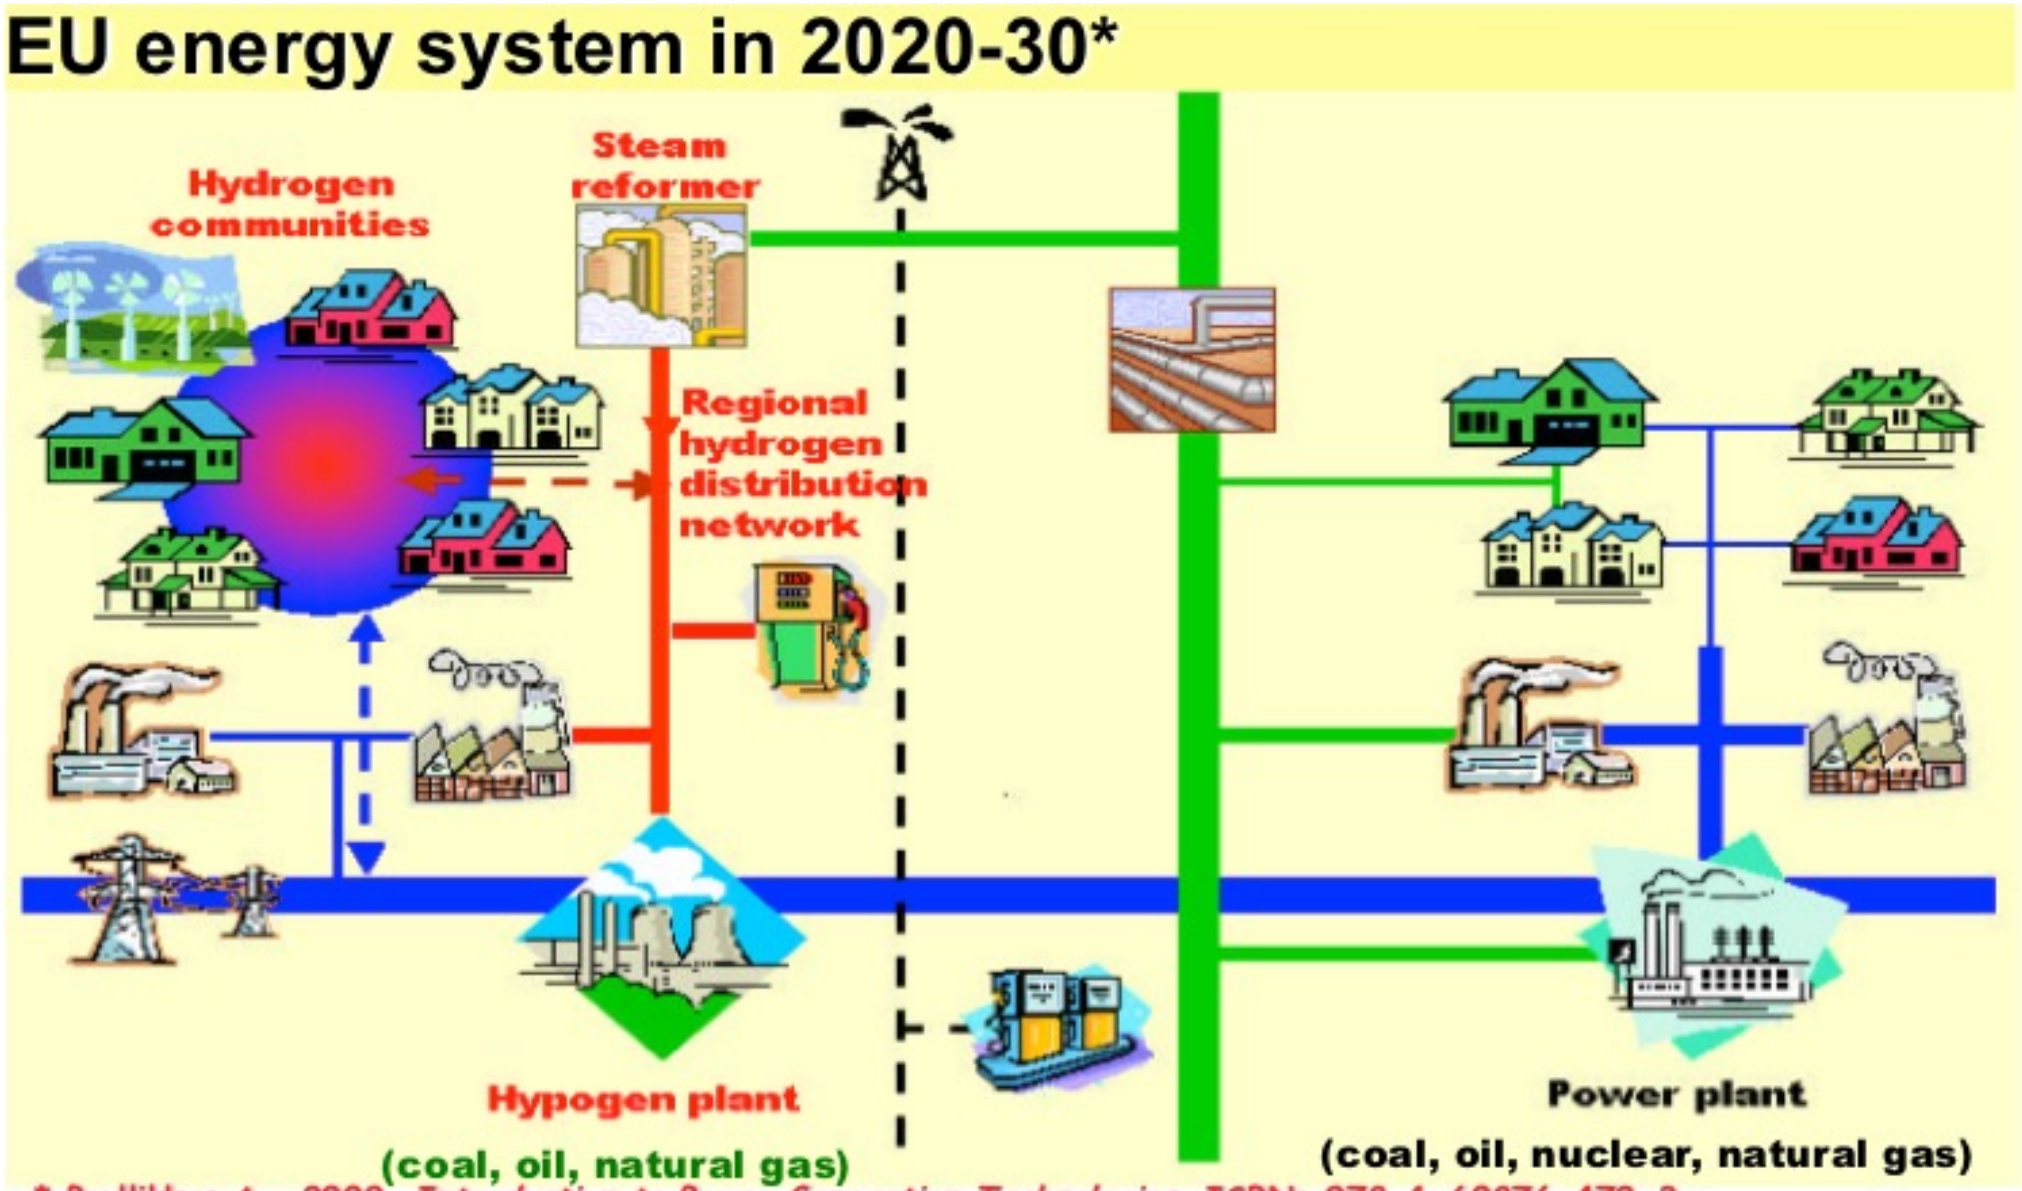
Current energy system

ρυθμιστική αρχή ενέργειας κύπρου
cyprus energy regulatory authority



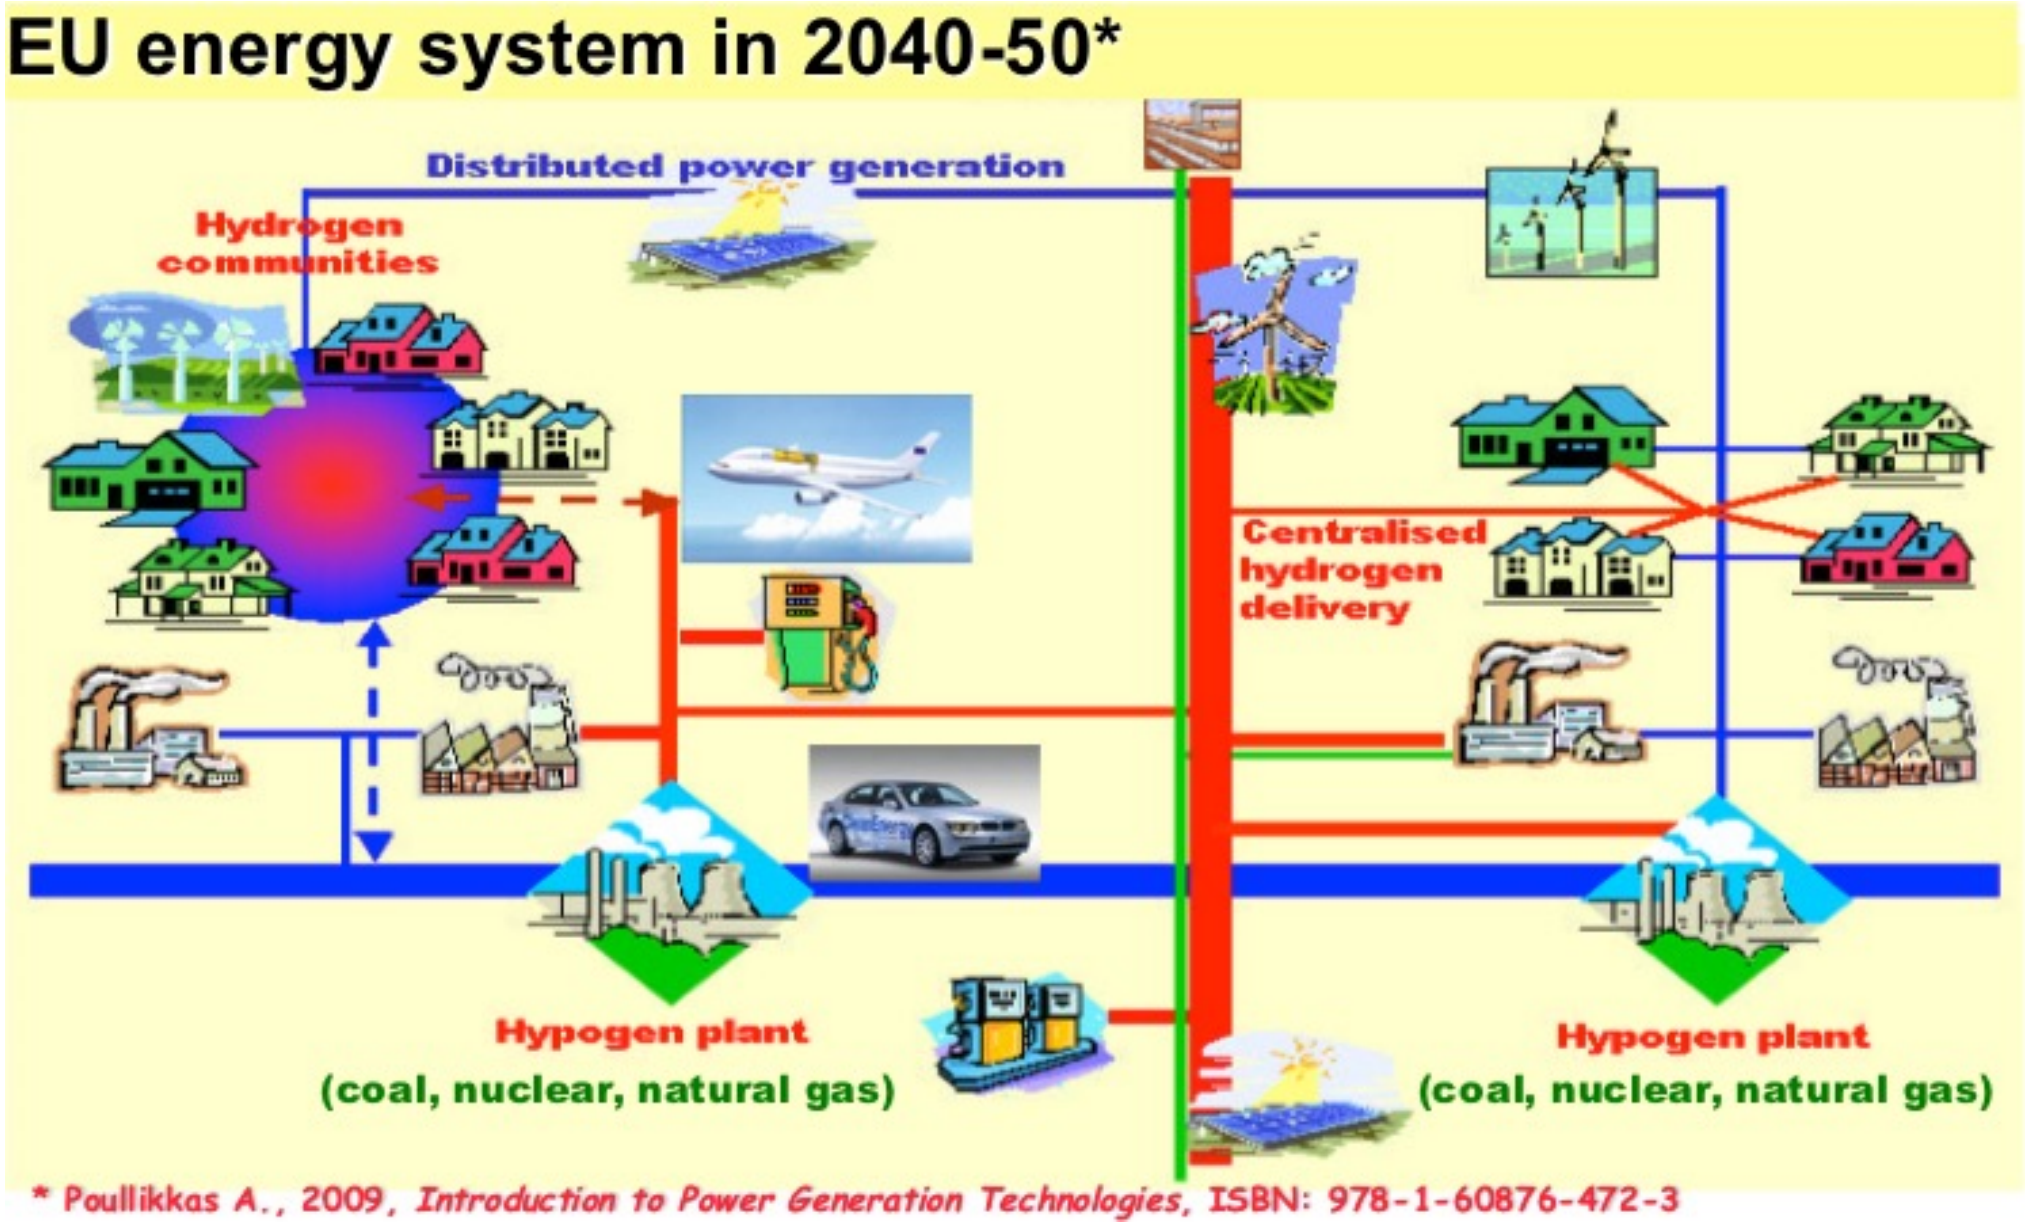
Future energy systems (optimistic scenario)

ρυθμιστική αρχή ενέργειας κύπρου
cyprus energy regulatory authority

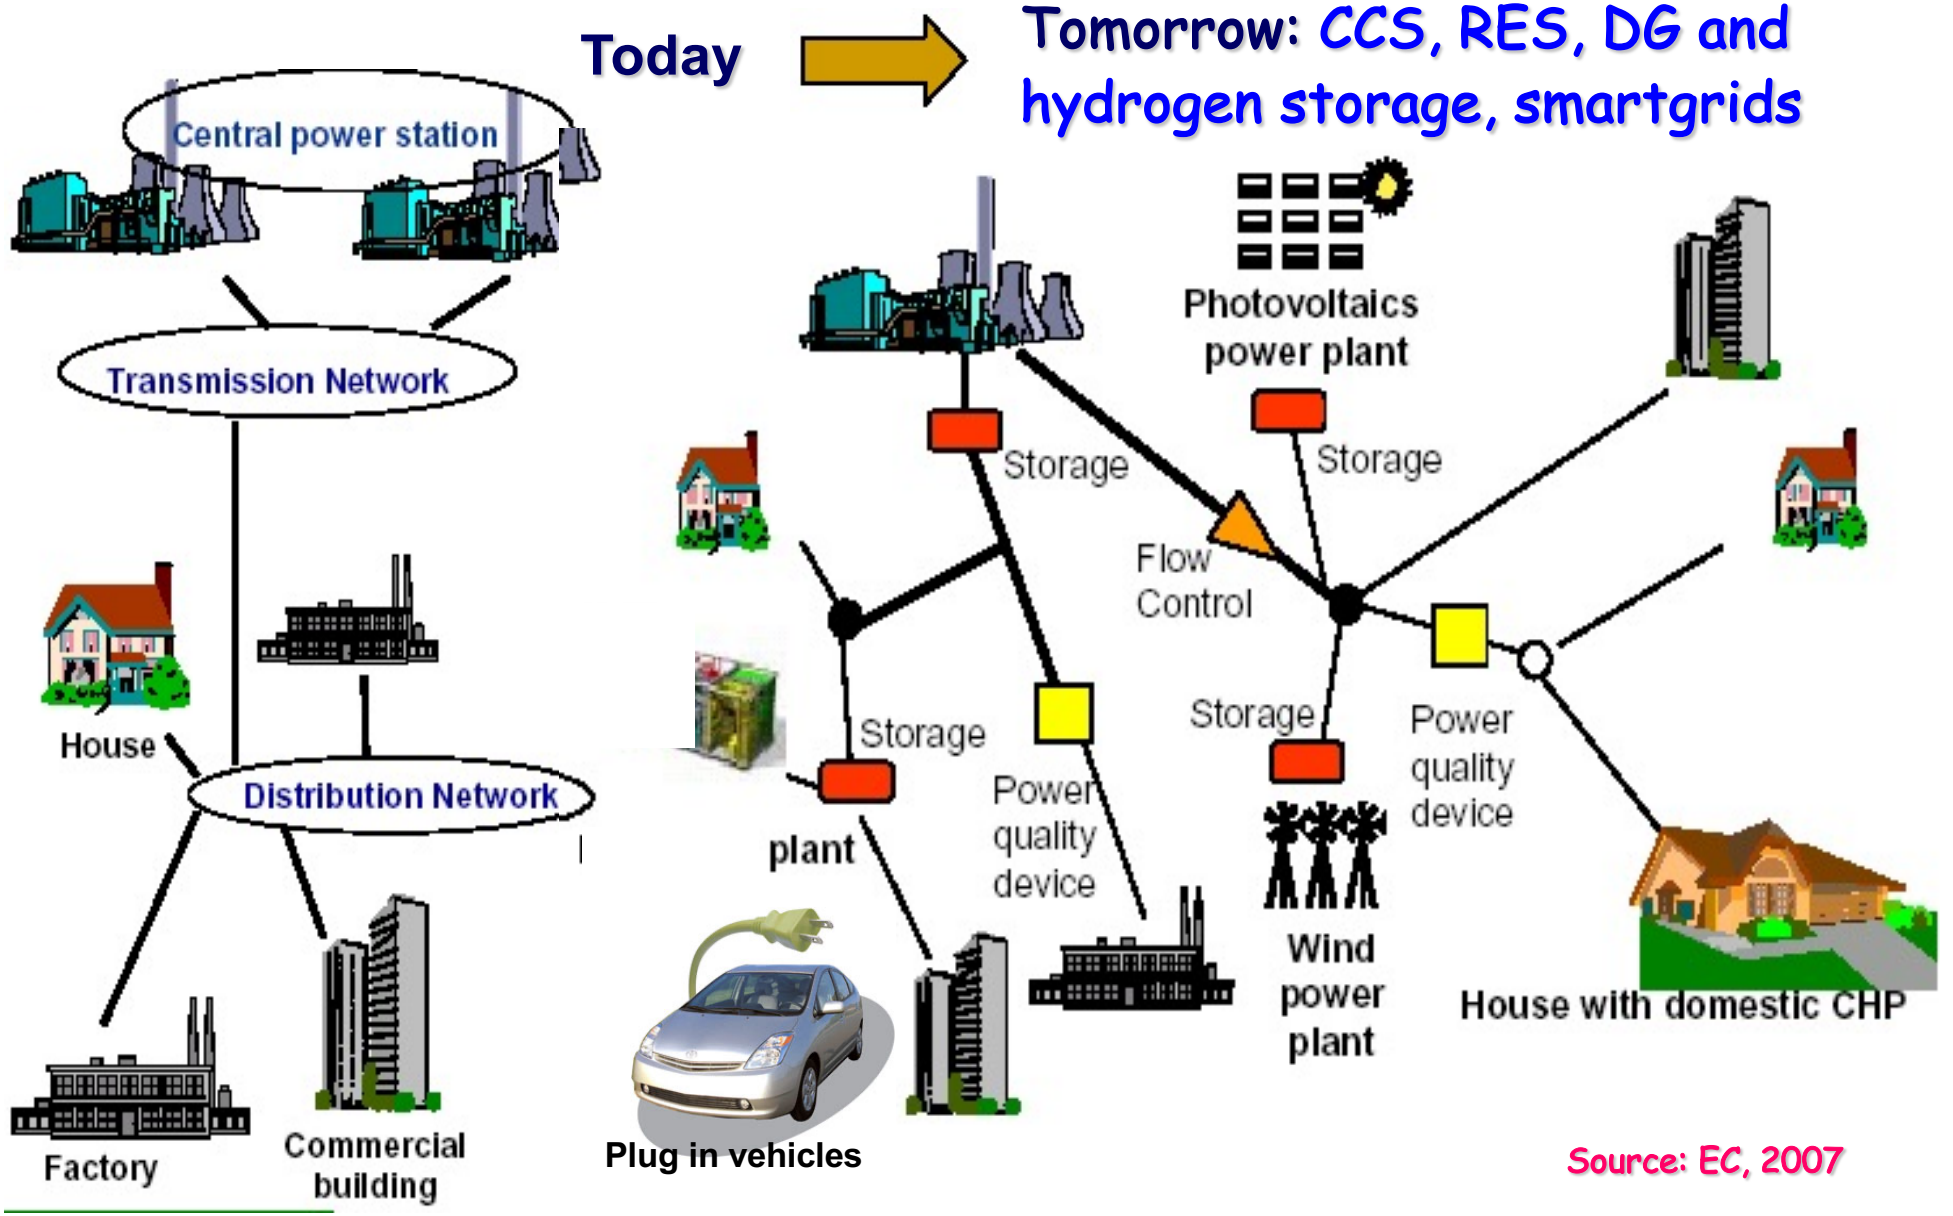


Future energy systems (optimistic scenario)

ρυθμιστική αρχή ενέργειας κύπρου
cyprus energy regulatory authority



Future power systems



The Super Smart Grid after 2050*
(may allow for 100% RES)

ρυθμιστική αρχή ενέργειας κύπρου

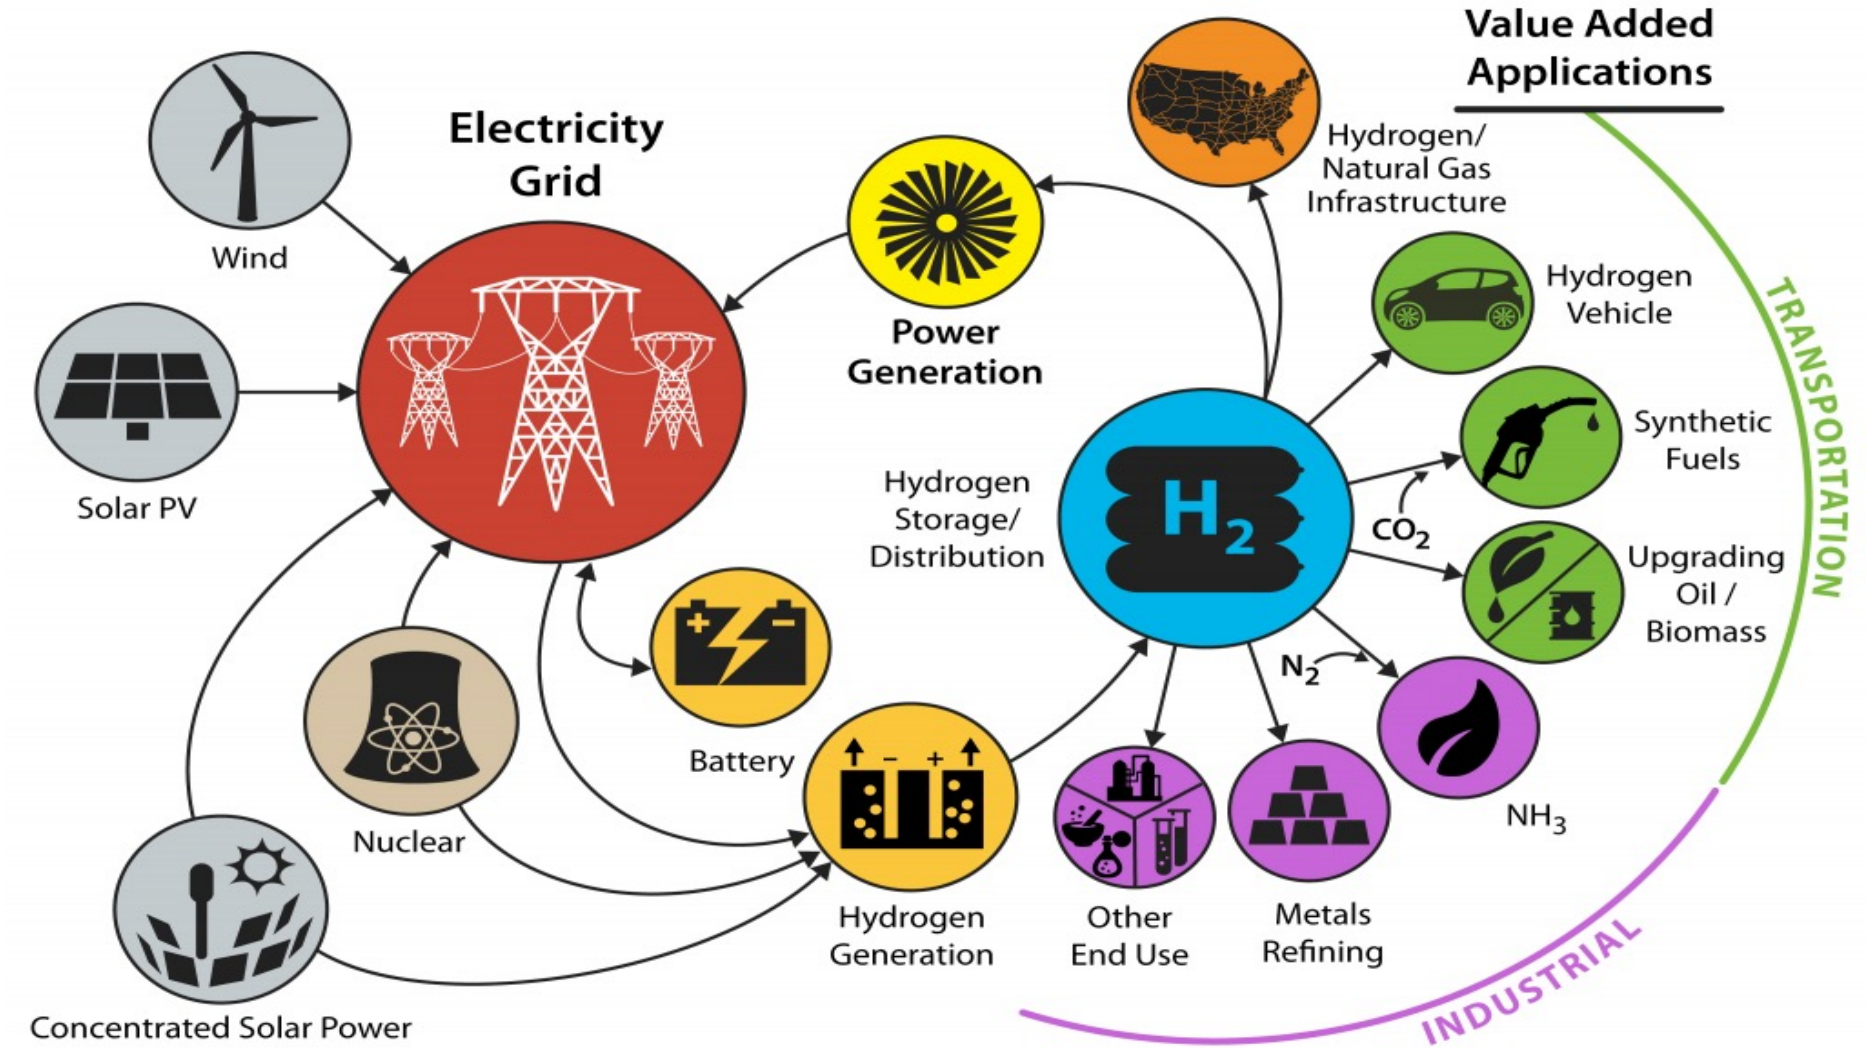
Long term scenarios in Europe

ρυθμιστική αρχή ενέργειας κύπρου
cyprus energy regulatory authority

Moving from Carbon economy to Hydrogen economy



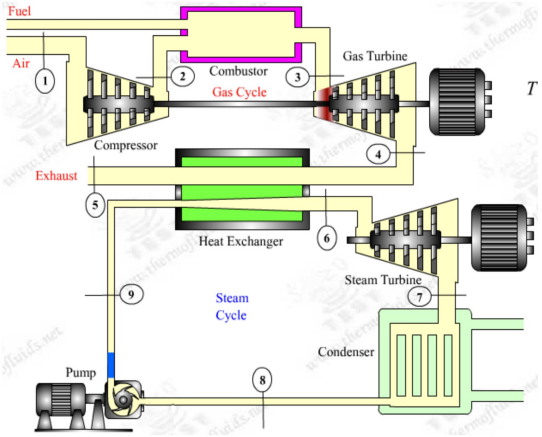
Cyprus current electricity and NG systems

Systems characteristics

Existing power generation system

ρυθμιστική αρχή ενέργειας κύπρου
cyprus energy regulatory authority

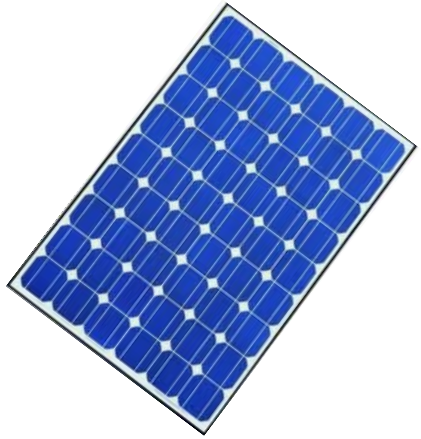
- **Steam turbine units (HFO)**
  - Dhekelia power station 6x60MWe
  - Vasilikos power station 3x130MWe
- **Combined cycles (Diesel)**
  - Vasilikos power station 2x220MWe
- **Gas turbine units (Diesel)**
  - Moni power station 4x37,5MWe
  - Vasilikos power station 1x38MWe
- **Internal combustion engines**
  - Dhekelia power station 6x17.5MWe (HFO)



Existing power generation system (cont.)

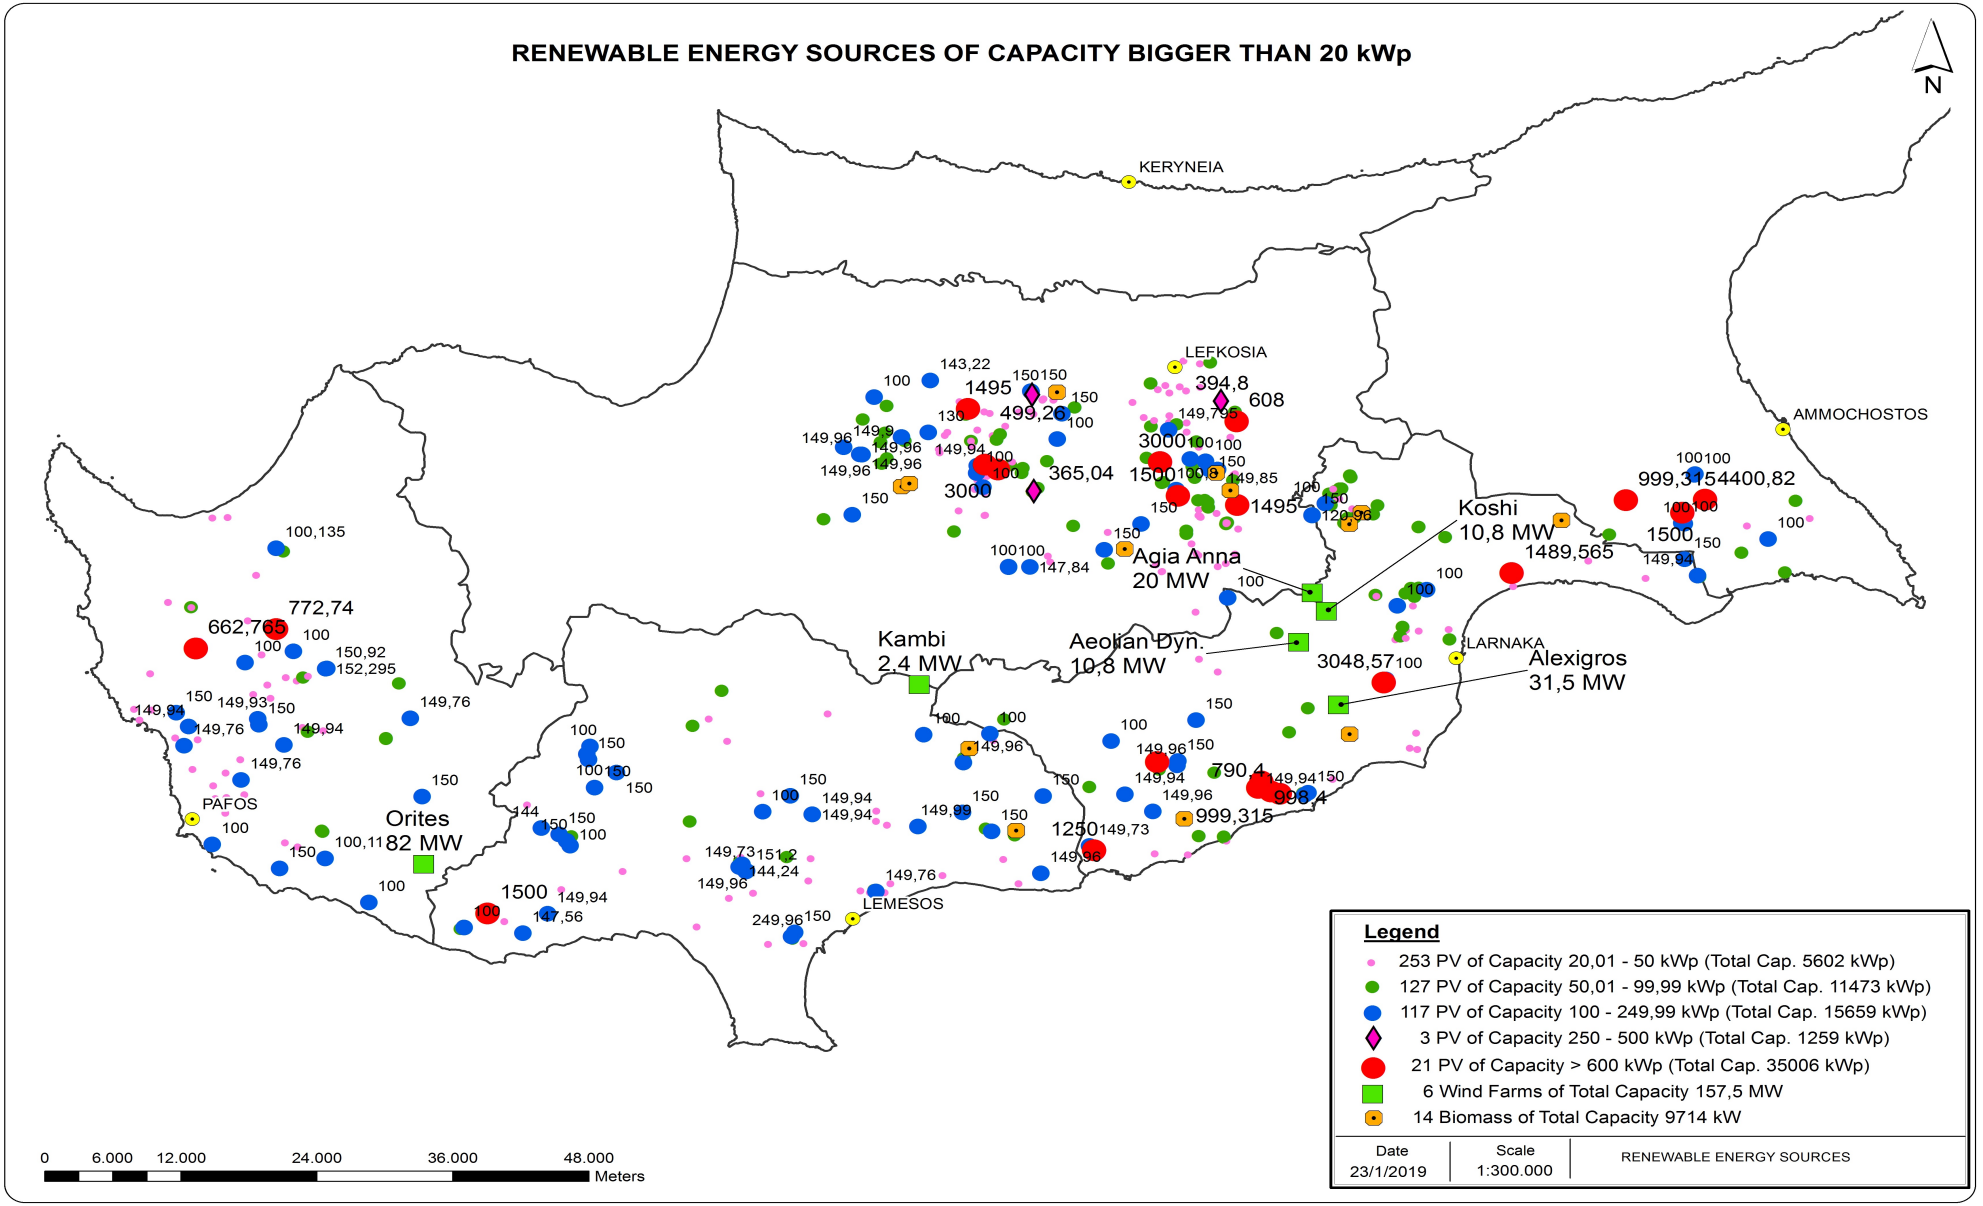
ρυθμιστική αρχή ενέργειας κύπρου
cyprus energy regulatory authority

- **Renewables**
  - PVs: 293MWe
  - Wind: 157MWe
  - Biomass: 13MWe



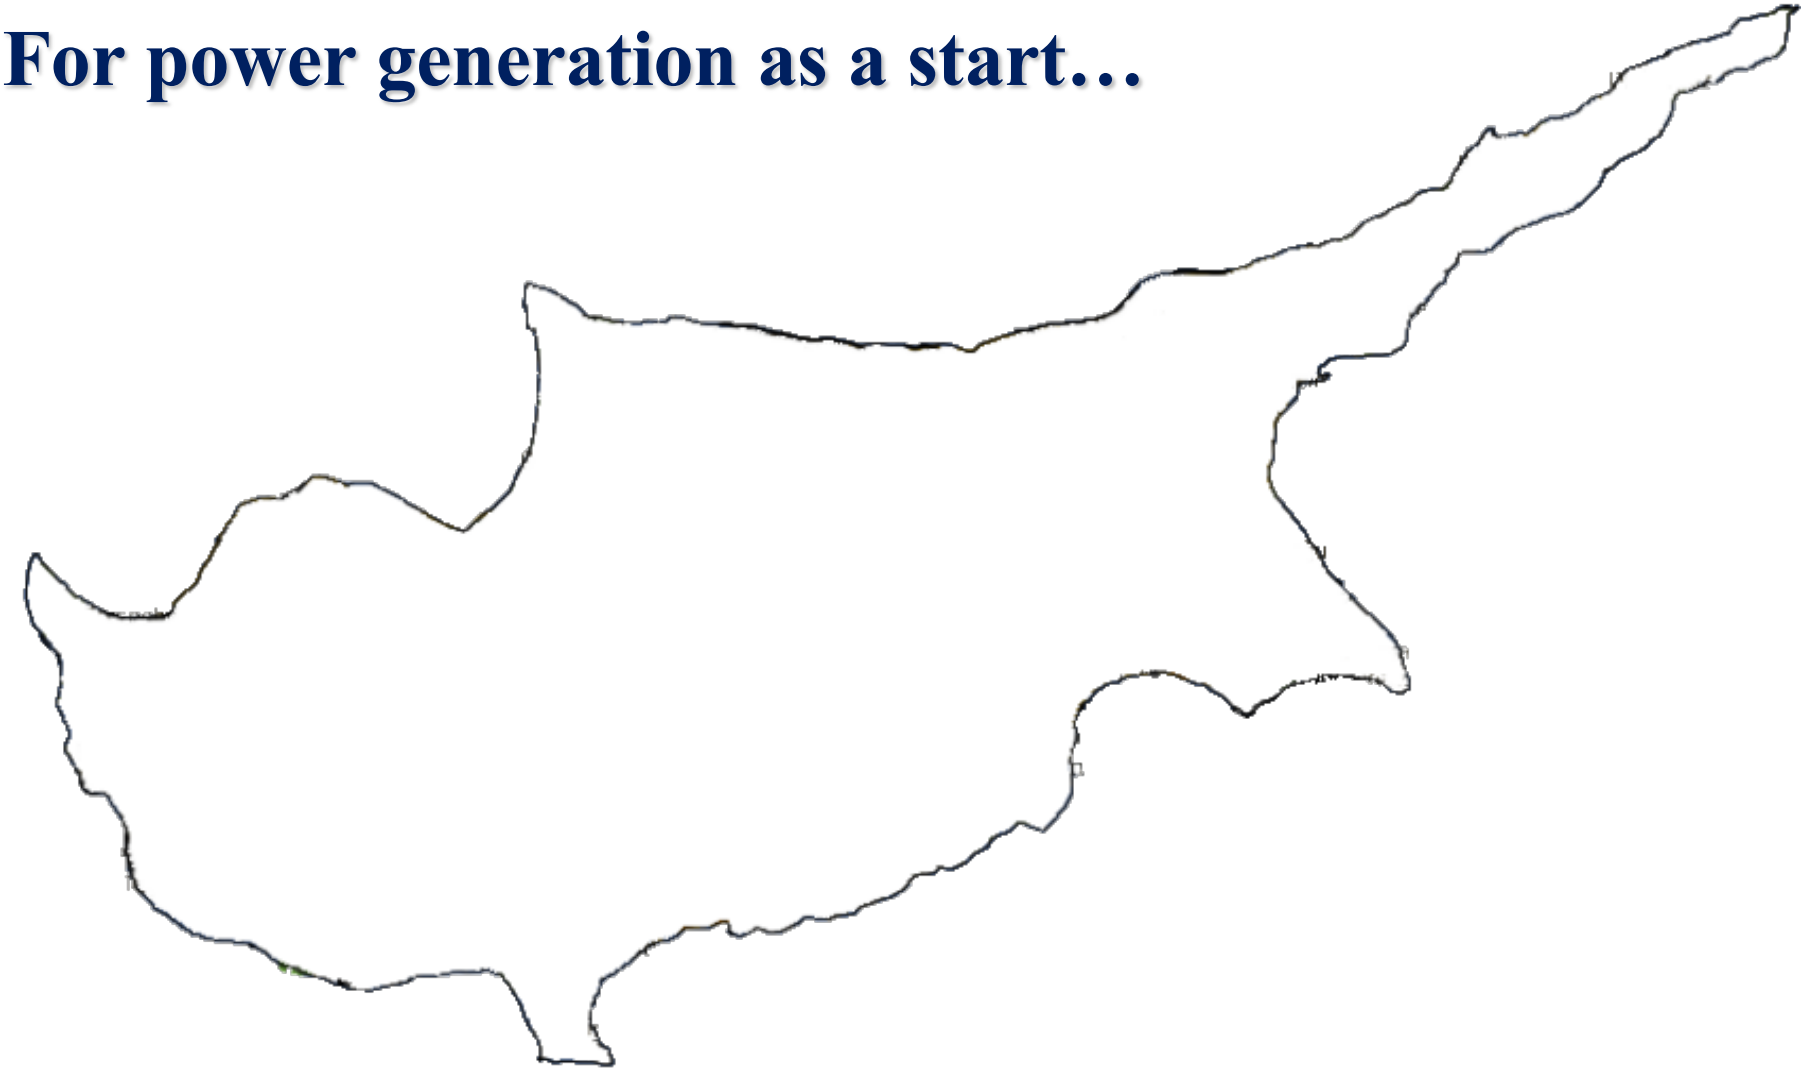
- **Total installed capacity:**
  - Conventional: 1483MWe
  - Renewables: 463MWe

Distribution of RES-E



Existing natural gas system

- **Under development !**
- **For power generation as a start…**



Energy transition for island systems

Solutions for isolated systems

Characteristics of isolated electricity systems*

- **High fuel costs**
  - ~ use of oil derivatives
  - ~ high CO_2 emissions (additional cost)
- **Economies of scale cannot be adequately exploited**
  - ~ generation units cannot exceed a certain size since the loss of a unit would mean the loss of a high percentage of the entire system
- **Need to maintain high reserve capacity to ensure power system reliability**

The smaller the electrical system size, the more the expenses will be

* Poullikkas A., 2015, *Sustainable Energy Policy for Cyprus*, ISBN: 978-9963-7355-6-3

Energy transition for non-interconnected islands*

ρυθμιστική αρχή ενέργειας κύπρου
cyprus energy regulatory authority

Need to:

- Reduce cost of security of supply
- Achieve market integration
- Increase socio-economic welfare benefits

* Poullikkas A., 2013, *Renewable Energy: Economics, Emerging Technologies and Global Practices*, ISBN: 978-1-62618-231-8

The solution*

- **Increase system flexibility**
  - ~ use natural gas, storage and RES for power generation
  - ~ integrate RES into electricity market
  - ~ promote e-mobility (V2G technology - bidirectional flow of electricity between the electric car and the grid)
- **Establish electricity interconnections**
  - ~ with EU internal electricity market (the island of Cyprus is the only non-interconnected Member State)
- **Production of hydrogen** (energy carrier)
  - ~ from RES and natural gas

* Poullikkas A., 2016, *Fundamentals of Energy Regulation*, ISBN: 978-9963-7355-8-7

CERA Energy Transition Regulatory Decisions

ρυθμιστική αρχή ενέργειας κύπρου
cyprus energy regulatory authority

- **Regulatory Decision 01/2017 (ΚΔΠ 34/2017): A detailed schedule for the implementation of EU electricity market target model**
- **Regulatory Decision 02/2018 (ΚΔΠ 259/2018): The mass installation of an Advanced Metering Infrastructure including smartmeters to all electricity consumers**
- **Regulatory Decision 02/2019 (ΚΔΠ 204/2019): The establishment of basic principles of a regulatory framework for the operation of electricity storage systems in the wholesale electricity market**
- **Regulatory Decision 03/2019 (ΚΔΠ 224/2019): The redesign of the power grid to become smart and bi-directional in order to allow integration of large quantities of renewable energy sources in combination with energy storage systems**

Medium to long term challenges

The role of interconnections and hydrogen

Regional primary energy sources

ρυθμιστική αρχή ενέργειας κύπρου
cyprus energy regulatory authority

Indigenous energy sources

Gas reserves in SE Mediterranean region*

ρυθμιστική αρχή ενέργειας κύπρου

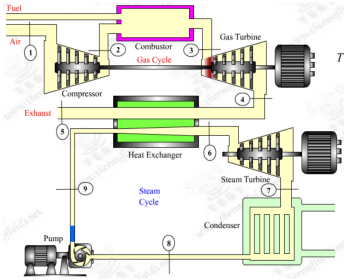
* Easac & Pihl, Erik. (2011). Concentrating Solar Power: Its potential contribution to a sustainable energy future

Main indigenous energy sources in SE Mediterranean region

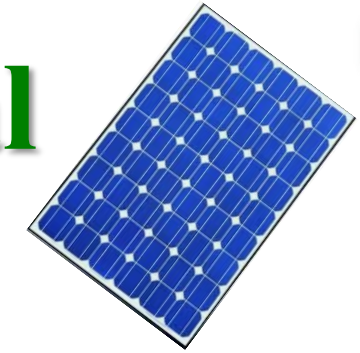
ρυθμιστική αρχή ενέργειας κύπρου
cyprus energy regulatory authority

- Natural gas



- Wind potential

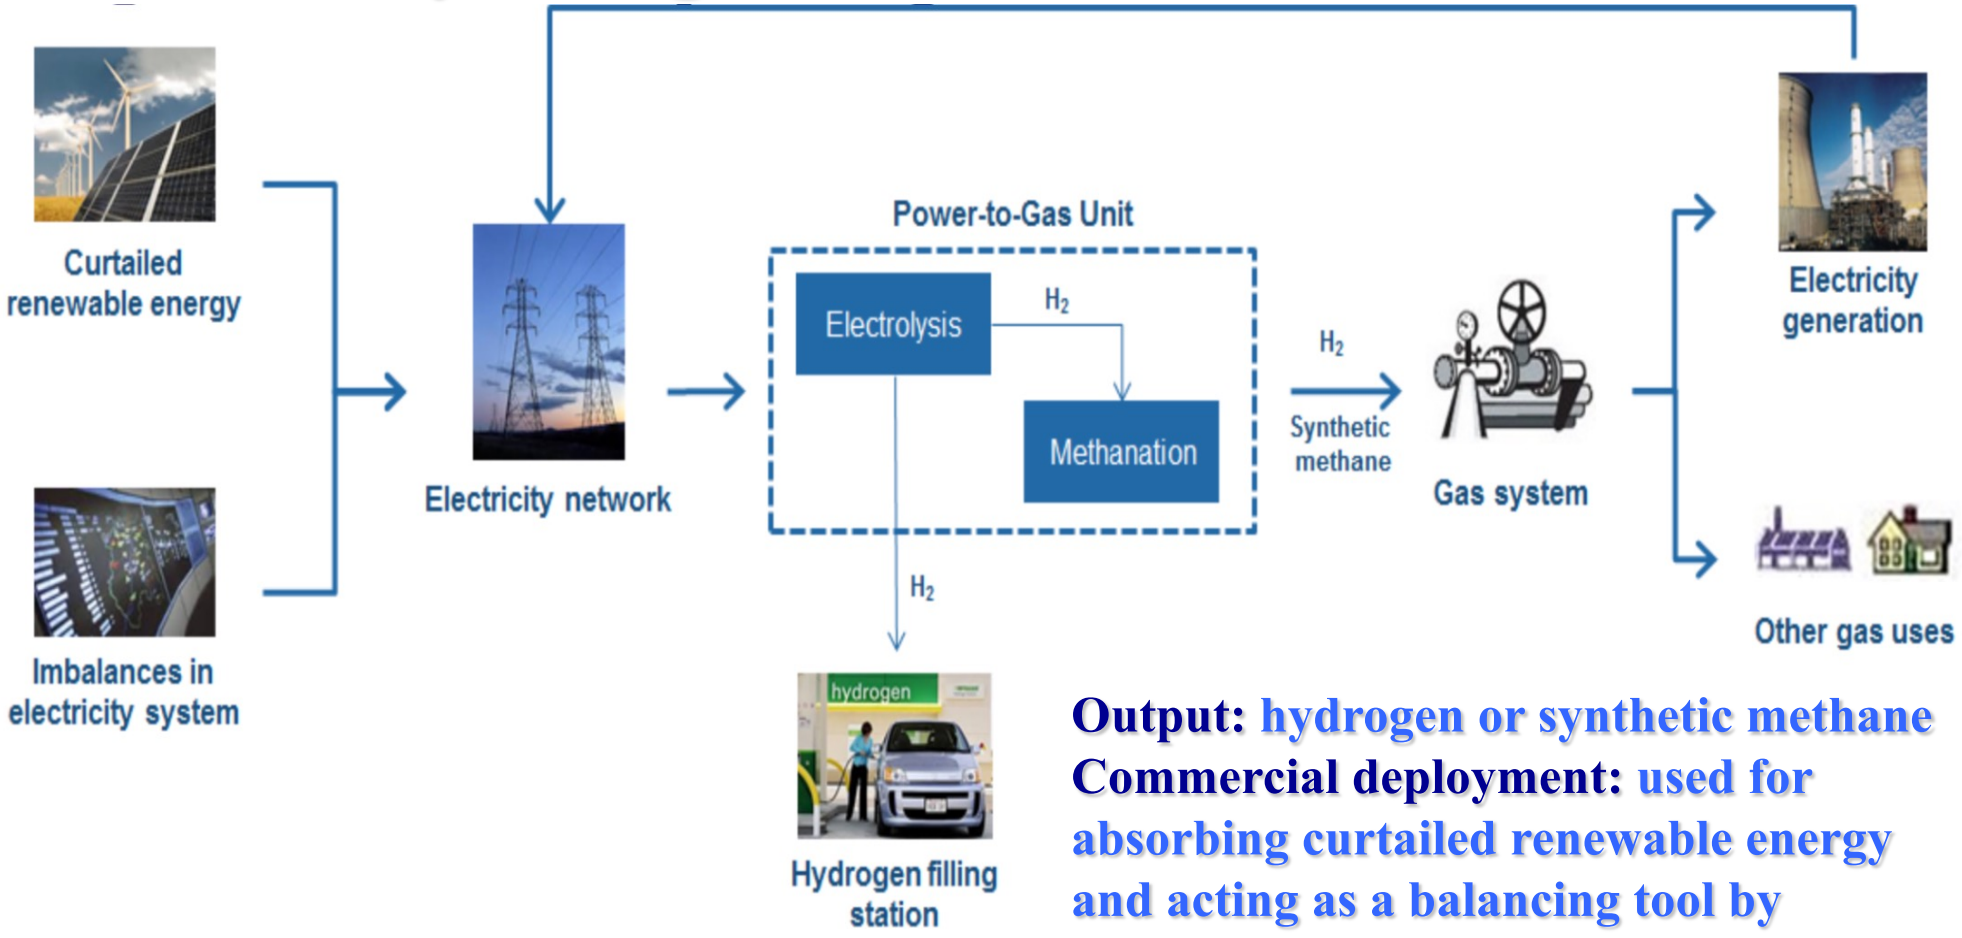
- Solar potential



hydrogen

Power-to-Gas (P2G)*

- **energy storage technology linking the electricity and gas infrastructure**



Output: hydrogen or synthetic methane
Commercial deployment: used for absorbing curtailed renewable energy and acting as a balancing tool by electricity TSOs

* Poullikkas A., 2009, *Introduction to Power Generation Technologies*, ISBN: 978-1-60876-472-3

Target-setting for Cyprus' transition to hydrogen economy*

ρυθμιστική αρχή ενέργειας κύπρου
cyprus energy regulatory authority

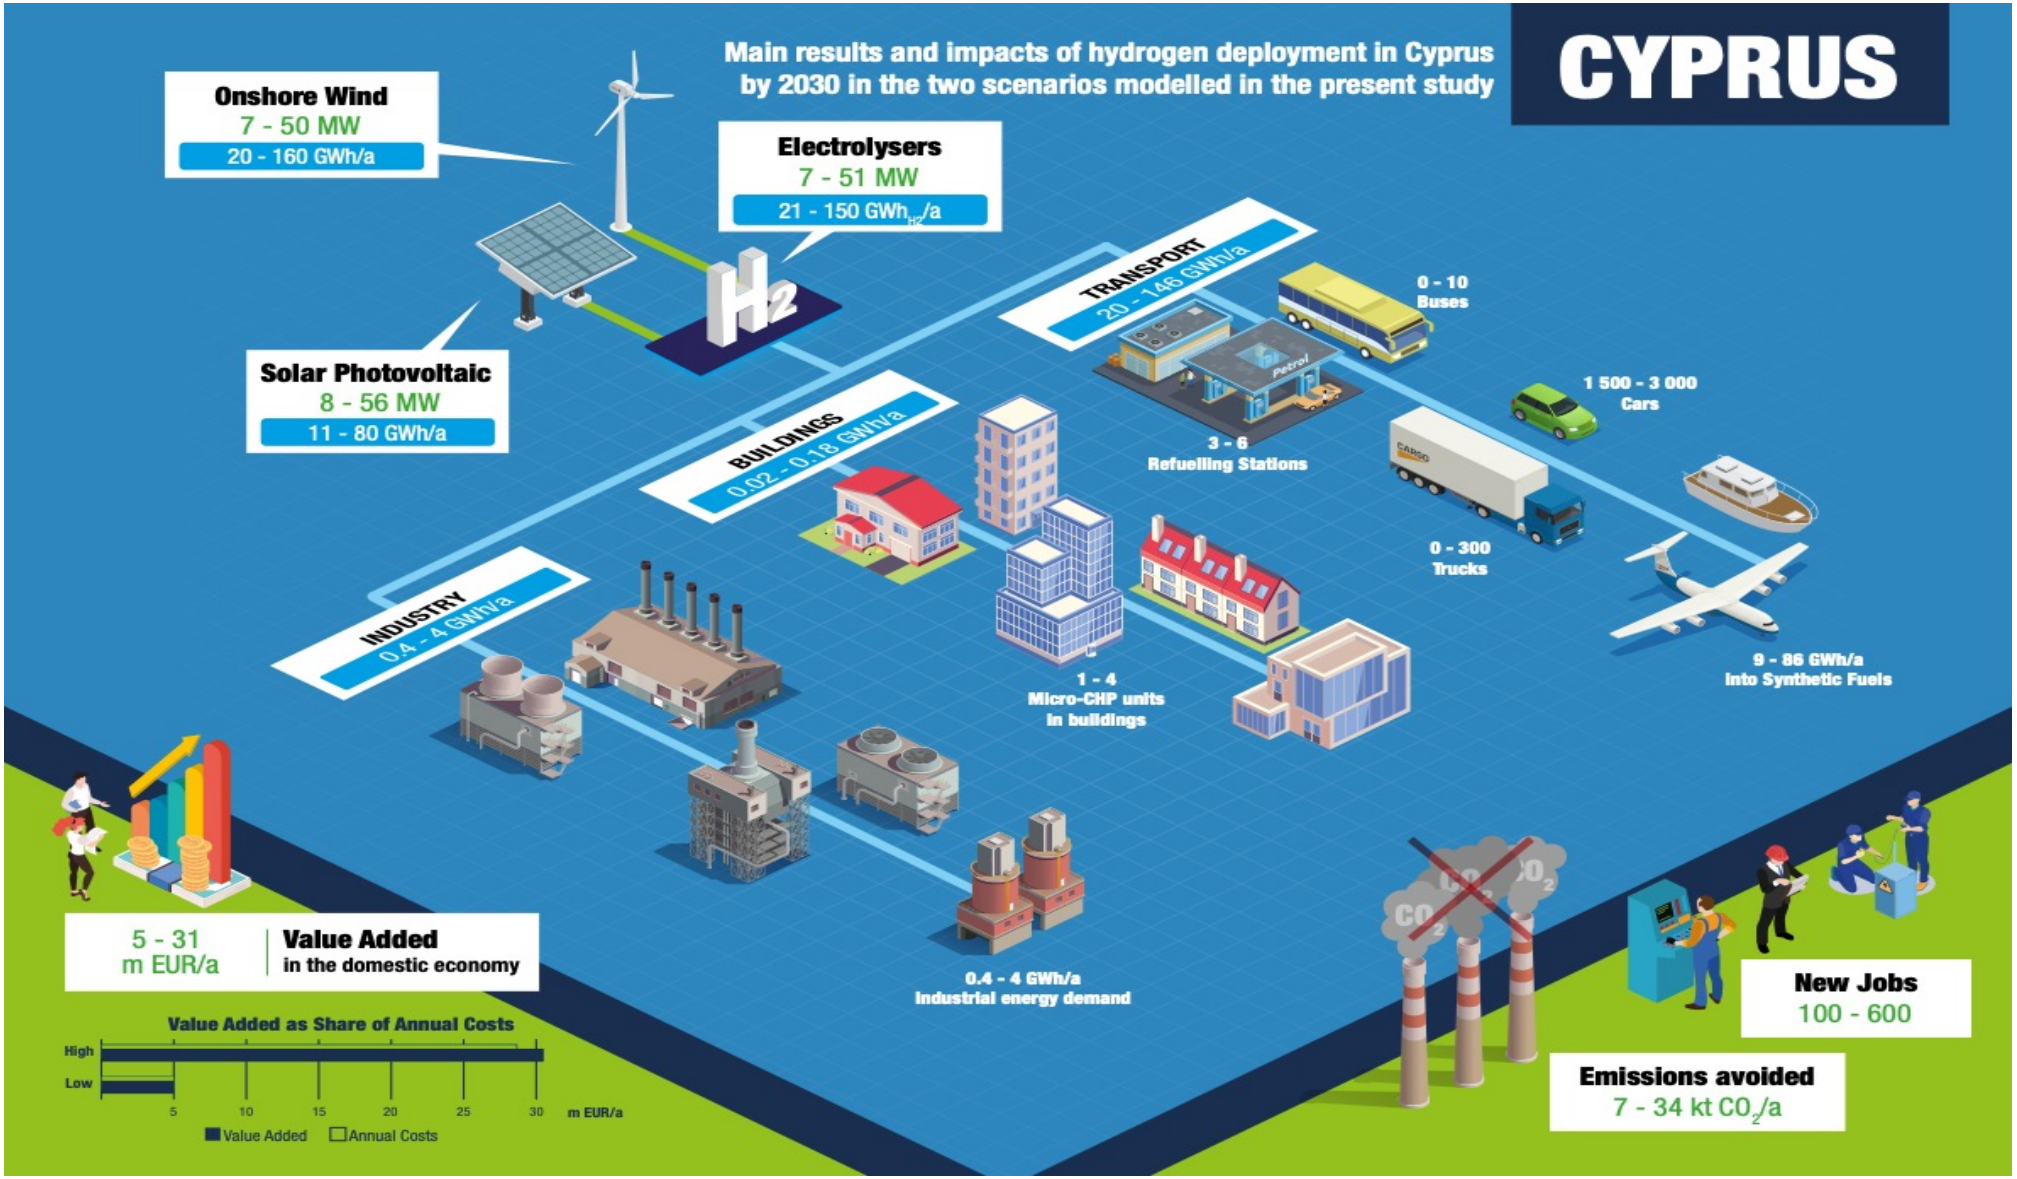
Target	Year		
	2030	2040	2050
Greenhouse gases	-30%	-75%	-100%
Renewable energy sources	30%	75%	100%
Electrical interconnections	50%	65%	80%

Cyprus could set a long-term goal of reducing greenhouse gas emissions by 100% by 2050 !

* Poullikkas A., 2020, *Long-term Sustainable Energy Strategy: Cyprus' Energy Transition to Hydrogen Economy*, ISBN: 978-9925-7710-0-4

Introduction of H2 in Cyprus's by 2030*

ρυθμιστική αρχή ενέργειας κύπρου
cyprus energy regulatory authority



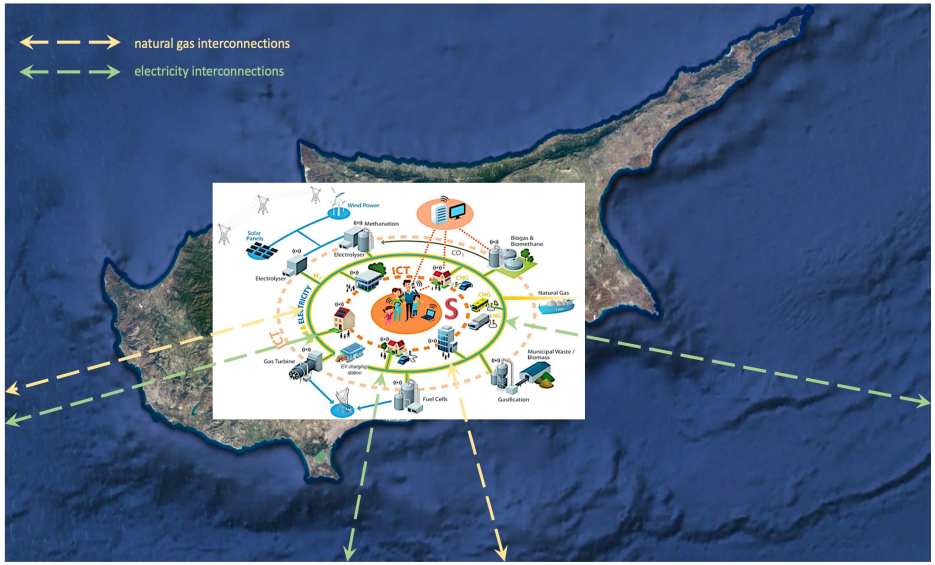
* FCH, EU, 2020

Energy transition by 2050

ρυθμιστική αρχή ενέργειας κύπρου
cyprus energy regulatory authority

Cyprus' energy system:

- smart and digitised
- flexible
- decentralised
- electrically interconnected
- interconnected gas and/or hydrogen pipelines



Integration:

- hydrogen in all energy sectors
- renewable energy sources
- storage energy systems
- electric mobility

Transition of Cyprus from the current carbon economy to hydrogen economy by the year 2050

Development of regional energy strategy ?

- **Horizon up to 2060**
- **Development of strategic plan for SE Med region:**
  - ~ **Electrical interconnections**
  - ~ **Pipeline interconnections (or virtual pipelines)**
  - ~ **Integration of sustainable technologies and storage**
  - ~ **Use of hydrogen after 2030**
  - ~ **Hydrogen production**
    - From natural gas
    - From renewables
- **Energy exporters to EU**
